

# STUDENTS ATTEND NASA WORKSHOP

Photos by Scott McCloskey

ABOVE: Cloe Vanscyoc of Sherrard sits at a computer during the NASA workshop held at Wheeling Jesuit University's Center for Educational Technologies. BELOW: A young girl is pictured taking a close-up look at a model of the Mars Exploration Rover. The workshop, called "Rockets to Racecars," was held in conjunction with the grand opening of the space shuttle Enterprise's new home on the deck of the retired aircraft carrier USS Intrepid in New York Harbor. During the workshop, students got a chance learn about the science of flight and racing, participate in several activities and watch a live videostream broadcast from the Intrepid Sea, Air & Space Complex in New York City.
